European Journal of Clinical Nutrition

Subject index to volume 43, 1989

S1, S2 refer to Supplements

Aboriginals
  malnutrition in children 161–168
Absorption
  of folate 631–635
  of iron and phenols 547–558
  of zinc, and achlorhydria 877–879
  of zinc, effect of phytate 431–440
Acarbose
  metabolic effects of 187–196
Acetate infusion
  effect on energy expenditure 107–115
Achlorhydria
  and zinc 877–879
Adaptation
  to chronic energy deficiency 27–33
Adipose tissue
  triacylglycerol extraction in 493–496
Adolescents
  Indian, lipid metabolism in 197–202
Alcohol
  and liver disease 615–621
Alcohol consumption
  and blood vitamin levels 175–186
  gamma-glutamyl transferase 809–818
Amazonian women
  nutritional status of 505–513
Aluminium
  content of milk and formulas 895–896
Amino acids
  in human milk 675–680
Anaemia
  in pregnant women 473–475
Andean children
  seasonal nutritional stress 597–602
Anorexia nervosa
  energy expenditure in 793–800
Anthropometry
  comparison with bioelectrical impedance 129–137, 503–504
  different indices 769–778
  stunting and 863–875
Antioxidants
  in sickle cell disease 609–614
Ascorbic acid
  in elderly 175–186
Atwater
  experiments of 529–537
Australian children
  aboriginal 161–168
  dietary assessment of 663–673

Bacterial fermentation
  in colon 21–25
Bangladeshi children
  nutritional status of 603–608, 837–843
Behavioural variables
  and hypertension 583–596
Benedict
  experiments of 529–537
Beta-carotene
  response in women 749–762
Bioelectrical impedance
  or anthropometry 503–504, 779–792
  assessment of body composition 623–629
  effect of body water 845–853
  in epidemiological studies 647–654
  results by different instruments 895–896
  use for whole body and body segments 779–792
Biotin deficiency
  in protein-energy malnutrition 169–173
Blood pressure
  changes in weight reduction 421–430
  coffee and plasma lipids 477–483
  in diabetics 35–44
  in 38-year-old Dutch men 809–818
Body composition
  by bioelectrical impedance 623–629, 779–792
Body density
  calculation of body fat 559–568
Body fat
  calculation of, in elderly 559–568
  calculation of, in obesity 569–575
Body mass index
  in elderly 231–236
  and hypertension 583–596
Brain development
  and amino acids S1/19–25
Brazilian women
  milk composition 253–266
  nutritional status 253–266
Breastfeeding
  Bangladeshi children 603–608
Breath hydrogen excretion 819–825
Burma
  endemic goitre in 693–698

Cancer
and Mediterranean diet S2/49–55
Cereals
in Indian diets 275–283
Children
Aboriginal 161–168
Australian 663–673
Bangladeshi 603–608, 837–843
Colombian 515–527
Kenyan with measles 391–401
Nigerian 705–713
Swedish diabetic 801–804
Cholesterol
consensus in Netherlands 89–96
effect of olive oil on S2/43–48
Chylomicrons
and triglyceride clearance 497–499
Cirrhosis
alcoholic 615–621
Cirrhotics
hypogonadism in 53–57
Coffee
effect on blood pressure 477–483
effect on serum lipids 477–483
Colombian children
energy expenditure and BMR 515–527
Colonic surgery
and faecal fatty acids 21–25
Creatinine
excretion during measles 391–401
Cytokines
relevance to nutrition 217–230

Diabetes
beet fibre diet 35–44
salt intake and glycaemic response 661–662
in Swedish children 801–804
type 2 and heredity 347–353
type 2, dietary habits and advice 59–68
Dietary advice
to diabetics 59–68
Dietary assessment
in Australian children 663–673
comparison of methods 663–673
statistical considerations 453–463
Dietary habits
in diabetics 59–68
Dietary history
validity 11–20
Dietary intakes
men in Wembley 245–251
comparative assessment in Europe 367–377, 379–390
Dietary recommendations
comparison of intakes with 245–251
Diets
classical S2/3–12
lactovegetarian and weight reduction 421–430
macrobiotic for infants 311–323
Mediterranean S2/1–92
Diurnal influences
effect of, on taurine in milk 675–680
effect of, on amino acids in milk 675–680
Doubly-labelled water method
in measurement of energy expenditure 737–748

Elderly
body mass index in 231–236
calculation of body fat 559–568
with fractured femurs 355–361
immunity and infections 827–835
loss of height in women 71–72
vitamin C levels in women 97–106
vitamin status in 175–186, 827–835
Encephalopathy
hepatic 615–621
Energy
cost of carrying loads 881–883
storage and transformation 637–639
Energy expenditure
by Colombian children 515–527
economy of 793–800
effect of acetate infusion 107–115
in infancy 641–645
of Swazi women 737–748
Energy intakes
day-to-day variation 465–472
Energy restriction
effect of added exercise 441–451
Enthalpy
and heat production 637
Europe
comparative dietary assessments 367–377, 379–390
Exercise
and energy restriction 441–451

Fat distribution
in Dutch men 809–818
Fat intake
of men in Wembley 245–251
Fatty acids
content in Indian diets 275–283
faecal after colonic surgery 21–25
Fetus
neurological development in S1/27–32
Fibre
in diabetic diets 35–44
Fibre content
salt and glycaemic response, effect on 699–703
Folate
absorption in man 631–635
intakes of Amazonian women 505–513

Folate status
of Amazonian women 505–513
of Brazilian women 253–266
in tuberculosis 411–420
Food processing industry
and IUNS 733–736
Fortification
of weaning foods 237–243
Frequency questionnaires
comparison with other methods 367–377, 379–390

Gamma-glutamyl transferase
as index of alcohol consumption 809–818
Giardiasis
in Aboriginal children 161–168
Glucose ingestion
effect of 493–496
Glycaemic response
to salt 661–662, 699–703
Goitre
in Burma 693–698
Gut hormones
in NIDDM patients 35–44

Haemoglobin
estimation in anaemic pregnant women 473–475
Health and Lifestyle Survey
choice of spread 1–10
Heat production
induced by meal 637–639
Height
loss of 71–72
Hypogonadism
in cirrhotics 53–57

Immunity
and vitamin status 827–835
Indian diets
fat content of 275–283
Infant formulae
energy content 579–580
Infants
energy expenditure 641–645
nutritional status 311–323
very low birth weight 339–346
Insulin
infusion, effect of 493–496
secretion after weight loss 539–545
Intervention
psychosocial 45–52
water and sanitation 837–843
Iron
absorption 547–558
bioavailability 237–243
intakes 505–513
status 253–266, 505–513

Isabgol husk
effect on faecal and serum lipids 197–202
IUNS
and food processing 733–736

Jamaica
the Kingston project 145–160

Kenya
children with measles 391–401

Lactation
Amazonian women 505–513
Brazilian women 253–266
and protein metabolism 681–691
Leprosy
undernutrition in 117–128
Lipaemia
postprandial 497–499
Lipoproteins
in NIDDM patients 35–44

Macrobiotic diets
nutritional status of infants on 311–323
Malnutrition
protein-energy and biotin deficiency 169–173
stunting and mental development 403–409
Maternal-child interaction
and psychosocial stimulation 45–52
Maternal diet
and protein metabolism 681–691
Measles
nitrogen excretion in 391–401
Mediterranean diet S2/1–92
and cancer S2/49–55
classical S2/3–12
composition of S2/13–29
in Spain S2/83–87
Mental development
in malnutrition 403–409
Metabolic rate
classical experiments 529–537
of Colombian children 515–527
constancy of 727–731
effect of exercise 441–451
in infants 485–492
variations in 465–472
3-Methylhistidine
excretion in measles 391–401
Milk
human, composition of 253–266
Milner
experiments of 529–537
Muscle mass
and survival 715–726

Netherlands
cholesterol consensus 89–96
Neurological development
and nutrition S1/1–32
in fetus S1/27–32
Nigeria
folates and tuberculosis 411–420
rehabilitation after malnutrition 705–713
Nutrient intake
of diabetics 347–353
of infants 311–323
on macrobiotic diets 311–323
of Swedish diabetic children 801–804
Nutrition policy
in Europe S2/57–66
in Greece S2/79–82
in Malta S2/71–77
in Norway S2/67–69
in Portugal S2/89–92
Nutritional adaptation
and variability 75–87, 203–208, 895–896
Nutritional stress
seasonal 597–602

Obesity
calculation of body fat 569–575
insulin secretion in 539–545
Oedema
clinical assessment of 581–582
Olive oil
effect on cholesterol S2/43–48
Orthopaedic patients
sip-feed supplements 267–274
vitamin D status 355–361
Osteocalcin
and vitamin D 355–361

Parenteral nutrition
in very low birthweight infants 339–346
Phenols
and iron absorption 547–558
Phenylketonuria
diet in S1/7–12
intelligence and behaviour S1/1–5
maternal S1/13–17
Phytate
and zinc absorption 431–440
Plasma lipids
and coffee 477–483
Polyunsaturated fatty acids
intake 11–20
Pregnant women
Amazonian 505–513
anaemia in 473–475
Protein metabolism
in lactation 681–691
Psychosocial stimulation
effect of 45–52
Pteroylmonoglutamic acid
absorption of 631–635
Pulses
in Indian diets 275–283

Recommendations
vitamin B_6 289–309
Rehabilitation
high energy supplement in 145–160
plant protein diets in 705–713, 763–768
Retinol
serum, in cirrhotics 53–57
Retinol-binding protein
in cirrhotics 53–57
Risk
assessment of 715–726
factors 1–10

Salt
and glycaemic response 661–662, 699–703
intake in UK 855–861
Serum lipids
in Dutch men 809–818
effect of isabgol husk 197–202
and polyunsaturated fatty acids 11–20
Siri's formula
use of 559–568, 569–575
Smoking
effect on blood vitamins 175–186
Sodium
in UK diet 855–861
Somatomedin-C
plasma, in Nigerian children 705–713
Starvation
protein economy in 139–142
Stunting
in malnutrition 403–409, 863–875
Substrate oxidation
effect of acetate infusion 107–115
Suckling
effect on taurine 675–680
effect on amino acids 675–680
Sugars
digestion of 819–825
Supplements
high-energy 145–160
iron 763–768
sip-feed 267–274

Taurine
concentration in milk 675–680
Thermogenesis
in undernutrition 27–33

Triacylglycerol
in adipose tissue 493–496
Tuberculosis
folate status in 411–420
in leprosy 117–128

Variability
and adaptation 75–87, 203–208, 895–896
Vegetable protein
rehabilitation diets 705–713
Vitamin B_6
requirements 289–309
Vitamin B_{12}
Brazilian mothers 253–266
Vitamin C
leucocyte levels 97–106
Vitamin D
in elderly with fractures 355–361
Vitamins
in elderly 175–186, 827–835

Weaning foods
haemoglobin-fortified 237–243
Weaning pattern
on macrobiotic diets 311–323
Wheat bran
reduced phytate 431–440

Zinc
absorption and phytate 431–440
and achlorhydria 877–879
and hypogonadism 53–57
Zinc intakes
Amazonian women 505–513
Zinc status
Brazilian mothers 253–266
